Installing Cisco VPN on your Mac:

1. Open the Macintosh Folder from the Finder window that appears.
2. Double-click the Vassar VPN Software icon on your desktop.
3. For MACOSX 10.1 – 10.3.9
   - Open the appropriate folder for the version of Mac OS you are running. If you are unsure, see: “What Version of Mac OS do I have?” at the end of these instructions.
4. For MacOSX or later
5. Double-click to begin the installation.
VPN Installation and Set-up
Instructions for Mac

Note: You may be asked to authenticate to continue with the installation.

On the Introduction panel, you will get a pop up asking for permission to determine if the software can be installed on your computer. Click Continue. When it’s done, click Continue on the Introduction panel as well.

Double-click to open the installation package.

Click where to install the software and click Continue.

Click Agree to agree to the license agreement.

Select a destination volume to install the Cisco VPN Client software.
VPN Installation and Set-up
Instructions for Mac

Click Install.

Once the installation is complete, click Close.
Configuring Cisco VPN on your Mac (First Time Only):

1. Launch VPN from Applications.
2. Choose Connection Entries from the Application Menu, and then choose Import.
3. Locate the Vassar Profile folder by clicking the Vassar VPN Software Icon in the side bar of the finder window. Open the Vassar Profile folder and choose Vassar.pcf. Click Open.

Note: You will only need to import the Vassar.pcf the FIRST TIME you launch VPN. Each time thereafter you may just highlight the Vassar Connection Entry and click the connect button.
The Vassar Profile will now appear in your connections list. Highlight it and click Connect.

Review the Vassar College Remote Access policy. Click Continue and you are now securely connected to Vassar Network Resources via Virtual Private Network (VPN).

Login using your Vassar username and password and click OK.
“What Version of Mac OS do I have?”

To find what version of Mac OS you are running on your machine

Click the Apple Menu in the upper left hand corner of your screen, and then choose About This Mac.

The About This Mac panel will appear displaying the version of Mac OS you are running. Choose the appropriate VPN Installation.
